In Case of Emergency

In the event of any disaster or public health emergency in Atlantic County, Public Health and Emergency Management officials recommend the following steps:

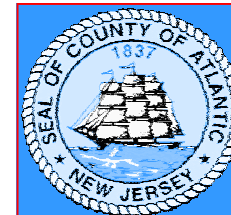

- Prepare ahead! Make sure that you have a personal or family emergency plan and kit.
- Listen to radio or TV for emergency messages and announcements!
- Depending on the situation, you may be instructed by public safety or health officials to evacuate to another location, or to a “shelter-in-place,” which means to stay where you are!
- Be prepared to help your family, friends and neighbors.

In a major emergency situation, it may take 24 hours or more for state and national resources to mobilize. Expect to take care of your own needs (and the needs of your family) for at least that long!

For information on developing your Personal Emergency Plan, visit www.ready.gov, www.njsp.org, or www.aclink.org/oep.

A Call For Volunteers

In times of emergency, Atlantic County needs a core team of residents that is ready and able to assist others in our community!

One of the key goals of the Atlantic County Division of Public Health is to respond to disasters as well as to prevent and control the spread of disease.

In the event of a bioterrorism attack or major outbreak of a naturally occurring illness in Atlantic County, we will need the help of many citizens to protect the health of our residents. We will need both medical and non-medical volunteers.

YOU can help!

What Citizen Volunteers Can Do in Times of Public Health Emergency

In a public health emergency, it is sometimes necessary to open large scale clinics to distribute antibiotics or give vaccinations to many people in order to prevent them from becoming ill.

Here are some of the ways volunteers can help when a mass public health clinic is activated:

Greeters

- Assist the public as they arrive at the clinic.
- Guide clients to proper places within the clinic.

Client Services

- Assist clients with forms.
- Guide clients from station to station within the clinic.

Information Technology

- Assist with data entry and other technology support.

Food Support/Canteen Staff

- Assist clinic staff and volunteers with food and beverage.

Translators

- Assist individuals who are hearing-impaired (ASL), or who are not fluent in English.

General Helpers

- Move supplies and materials as needed within the clinic.

Clergy & Religious Leaders

- Assist with the spiritual needs of clients waiting in line.

Child-Care Workers

- Help small children remain calm.

Volunteer Information

(Medical/Professional see back of form)

Name: _____

Address: _____

Phone: _____

Email: _____

I would be interested in volunteering as:

- Greeter
- Client Services
- Information Technology
- Food Support/Canteen Staff
- Translator
- I am fluent in ASL or
 language _____
- General Helper
- Clergy & Religious
- Child-Care Worker
- Other _____

Please send me more information about becoming a volunteer.
