Meadowview Nursing Home

**A pleasant,
modern facility
dedicated to
enhancing the
quality of life for
Atlantic County
residents.**

Welcome to Meadowview!

Meadowview, the nursing home of Atlantic County, has earned a reputation of excellent, quality care since the early 1970s. Today, our pleasant, modern 180 bed facility continues to offer long term care and rehabilitation service under the direction of a professional staff, dedicated to enhancing the quality of life of our residents. Conveniently located in Northfield, Meadowview's landscaped grounds are highlighted by a lovely park and gazebo enjoyed by residents and visitors throughout the year.

Comprehensive Care

At Meadowview, we have an inter-disciplinary approach to patient care. Working as a team, our doctors, nurses, dietitians, therapists, social workers and recreation professionals develop a comprehensive and fully coordinated care plan for each patient.

Complete medical services are provided. Staff physicians make frequent rounds Monday through Friday, and are available twenty-four hours, seven days a week as needed. Dental services are provided on-site through the John H. Cronin Dental Center, operated by Atlantic County in conjunction with the University of Medicine and Dentistry of New Jersey. Podiatry services are available through a consulting service in our on-site foot clinic. Hospital care is available just minutes away at Shore Memorial Hospital or Atlantic City Medical Center.

Our dedicated staff of registered nurses, licensed practical nurses and certified nurse aides work together to provide excellent care on a daily basis. We encourage our staff to advance their training by offering ongoing educational programs featuring new techniques and medical advances.

Therapy Services

Meadowview provides a full range of physical, occupational

and speech therapy rehabilitation services in a fully equipped therapy gym. Therapies are available for post-acute care hospital rehabilitation in addition to ongoing restorative services, using an interdisciplinary approach, designed to provide residents with the opportunity to achieve and maintain the highest practicable level of day-to-day activity.

Recreational Services

Meadowview's recreation department offers residents carefully planned therapeutic activities which meet their physical, social, and spiritual needs in group and individual settings. Birthdays and holidays are made special with celebrations and decorations throughout our facility.

An active volunteer group of caring men and women, known as The Friends of Meadowview, assists both residents and staff in countless ways. Our volunteers operate the home's well-stocked gift shop. Most importantly, they provide residents with friendship and companionship.
